WALK DATE / TIME

RESPONSIBLE PERSON / REQUIRED SAFETY ROLE

PRE-START SITE WALK

- [ ] Access paths, stairs and exits are clear; public / occupant access is controlled.
- [ ] Task-specific PPE, training and emergency contacts are confirmed.
- [ ] First aid, fire extinguishers and emergency access are available.
- [ ] Housekeeping, debris removal and material storage reduce trip / fire risks.
- [ ] Tools, cords, guards and temporary power protections are inspected.
- [ ] Ladders, scaffolds and fall protection are checked by the competent / qualified person required for the task.
- [ ] Task-specific dust / silica controls, ventilation and occupied-area containment are in place.
- [ ] Hazardous materials are assessed before disturbance; stop if suspect.
- [ ] Utility isolation / lockout and hot-work controls are confirmed as applicable.
- [ ] Lifting, excavation and other high-risk work have task-specific controls.

STOP WORK for imminent danger. Secure the area and notify the responsible supervisor. A checked item does not establish that a condition is safe.

SITE SAFETY CHECKLIST

Document the hazard, a control and who confirms safe reopening. Do not record sensitive medical details here.
